

ASHUTOSH DUBEY

Full Stack Web Developer

ashutoshkdubey007@gmail.com | +91-7067581520 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Full Stack Web Developer with hands-on experience across three internships building AI-powered applications, RESTful APIs, and responsive web platforms using React.js, Next.js, Node.js, Express.js, Python, and MongoDB. Skilled in authentication systems, Azure middleware, Docker, and vector-database-driven AI retrieval (LangChain, FAISS). Seeking a full-time Full Stack Developer role.

Technical Skills

Programming Languages: C++, C, JavaScript, Python, TypeScript

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Astro.js

Backend: Node.js, Express.js, Flask, FastAPI, REST APIs

Databases: MongoDB, SQLite, Directus

AI / ML: LangChain, FAISS Vector Database, Document Embeddings, RAG

Tools & Platforms: Git, GitHub, Linux, Docker, Microsoft Azure, CI/CD Fundamentals

Core Concepts: Data Structures & Algorithms, OOP, Authentication & Security, Agile

Professional Experience

AI Chatbot Developer — ZeTheta

Remote | Mar 2025 – Jul 2025

- Built scalable AI-powered chatbot applications using Python, LangChain, and REST APIs, cutting user response time by 80% and greatly reducing manual intervention.
- Implemented retrieval-based response systems using FAISS vector databases and document embeddings to improve response accuracy.
- Collaborated with the engineering team on debugging, testing, and improving overall software reliability.

Software Developer — Nexora Cogniware

Gwalior, India | Jun 2025 – Nov 2025

- Developed multiple responsive pages and reusable UI components for the company website using Astro.js and Tailwind CSS.
- Built authentication and authorization middleware on Microsoft Azure, securing user access across the platform.
- Integrated frontend components with RESTful APIs to fetch and render dynamic data from a Directus headless CMS in real time.

Software Developer — Turing

Remote | Nov 2025 – Dec 2025

- Built a secure user authentication system, implementing industry best practices for login and session management.
- Gained hands-on experience with Linux environments, including command-line operations and system administration.
- Applied Docker fundamentals to containerize applications, improving deployment consistency across environments.

Projects

Stalker — Full-Stack Stock Market Tracking Platform — Next.js, TypeScript, Tailwind CSS

- Built a full-stack platform delivering real-time market insights, top gainers/losers, and personalized news summaries.
- Integrated Inngest for automated daily email updates, the Finnhub API for live stock data, and Nodemailer for email delivery.

NexTaLK — Real-Time Chat Application — MERN Stack, Socket.io

- Developed a real-time chat application using the MERN stack with Socket.io for instant messaging.
- Implemented user authentication, private/group chats, and message persistence with MongoDB, optimized for scalability and responsiveness.

CHATBOT-AI — Responsive Gemini Platform Clone — HTML, CSS, JavaScript, React.js

- Built a fully responsive clone of the Gemini platform using modern web technologies and dynamic UI components.
- Applied performance optimization techniques for fast, seamless interactivity across all devices and screen sizes.

Education

B.Tech, Computer Science — ITM Gwalior

Gwalior, Madhya Pradesh | Nov 2022 – Jul 2026

Certifications

- Zscaler Cyber Security — Zscaler
- Oracle Cloud Infrastructure Generative AI Certification — Oracle
- JavaScript Specialist Certification — HackerRank
